

TIBCO EBX and TIBCO Cloud EBX Master Data Management

Improve management of master, reference, and metadata with MDM as-a-service. EBX software delivers self-service access of cloud-native MDM capabilities, consumption based pricing, and flexible finOps.

Learn more about TIBCO Cloud EBX MDM. For more information on the broad capabilities provided by TIBCO EBX software and the use cases it addresses, refer to the [datasheet](#)

For over two decades, EBX software has defined the master data management market, offering everything organizations need within a single platform to manage, govern, and share their data. It creates maximum flexibility through fully configurable applications that can be generated on-the-fly, helping you succeed in:

Operations

- Maintain and sync a single source of truth with semantic reconciliation
- Coordinate across the value chain with master, reference, and metadata
- Collaborate across your enterprise through social team features and visualization
- Manage multiple domains and ensure data stewardship and governance

Analytics

- Get valid and consistent data in the form needed for analytics and reporting tools
- Transform abstract complexity (conformed dimensions) into simple-to-use structures (such as hierarchies)

Compliance

- Maintain compliance (regulatory, legislative, and/or corporate)
- Create policies and controls and monitor their adoption and impact
- Keep a record of evidence
- Manage technical information centrally using data governance controls

Why TIBCO EBX?

Model-driven Design

An agile design tool that automatically generates applications and user interfaces for authoring, data stewardship, workflow, hierarchy management, and integration.

Multidomain

Forget one domain per silo. In one solution, master and model any and all domains and relationships, including reference and metadata, with the tool that invented multi-domain MDM.

Smart and Scalable

Data is ever-increasing, and whether you have thousands or billions of rows, EBX software scales to your needs. You can start small and grow without having to retool or buy additional licenses.

All-in-One

EBX features are under one license, eliminating the need for separate component licensing. Out-of-the-box, you get all the capabilities you need to configure and deliver enterprise data transformation.

Business-focused

EBX software benefits everyone, not just data experts and developers. Empower your business users with self-service capabilities that encourage enterprise-wide adoption through collaborative governance.
