Zombie Dashboards Can’t Keep Up

The volume and velocity of data your business needs to run is exploding.

Get Better Insights with TIBCO Spotfire 11

Traditional approaches to analytics don’t easily adapt to new demands.

Zombie dashboards may look alive, but they’re flat and static, and cost you the agility you need.

Your people are already pushing the boundaries of what they can accomplish.

The Walking Dead: Conventional BI

1. Shallow dashboards miss important insights.
2. Visual analytics, data science, and streaming analytics are disconnected and not well integrated.
3. Manual effort slows your time to insight.

Survive & Thrive with Spotfire 11 and Hyperconverged Analytics

Immersive: Make generating the most valuable insights intuitive, seamless, and collaborative with:
  • Natural language query
  • Automatic brush-linking
  • Interactive AI

Smart: Increase intelligence by combining:
  • AI-driven recommendations
  • Point-and-click data science
  • Geospatial analytics

Real-time: See what’s happening now and query the future by combining:
  • Real-time streaming BI
  • Data science
  • All your other analytics tools

Your people are already pushing the boundaries of what they can accomplish.

Plus, Build Custom Analytics Apps Faster with Spotfire 11 Mods!

Like gaming add-ins, Spotfire 11 Mods are lightweight, fit-for-purpose, reusable components that exploit all the power of TIBCO Data Science and Spotfire analytics.

Use them to build tailor-made, interactive visualization and user interface capabilities for advanced analytics applications.

Combine historic, streaming, and data-on-demand from any Spotfire supported data source.
