ZE PowerGroup

INCREASED

Market share and close rates
Objectives

1. Deliver an IT infrastructure that enables effective communications between aircraft, Eurocontrol, customs, pilots, and many third parties.
2. Ensure that operations are cost-effective, run smoothly, and deliver high-quality service.
3. Deliver a customer-oriented solution based on external web services and global market standards.

Solution

- TIBCO ActiveMatrix BusinessWorks™
- TIBCO Hawk®
- TIBCO Enterprise Message Service™
- TIBCO BusinessEvents®

Business Outcomes

1. Improved customer service for departure delays, enabling Eurocontrol to be automatically informed of flight plans and destinations.
2. Centralized communications and data flow for fine-grained visibility into real-time operations and improved business performance at each airport.
3. Orchestrated steps that validate passengers and allow them to embark quickly, thereby improving quality of service.

"TIBCO delivers extreme value because it allows us to deploy a very reliable infrastructure for our customers. We can follow the business in real time. It allows us to improve the passenger experience."

—Frederic Jacques, Operations Middleware Manager
Objectives

1. Become indispensable to clients’ business, data, and IT models.
2. Enable clients to respond to business demands and gain competitive advantage using a flexible, scalable, extensible API management solution.
3. Drive the bottom line.

Business Outcomes

1. Improved market position for clients, fulfilling the goal of being indispensable.
2. Fast automation of customers’ end-to-end business processes, allowing them to move much faster from quote to order or quote to cash.
3. New products and services for customers, improving the bottom line.

Solution

- TIBCO Cloud™ Integration
- TIBCO Mashery®

“One of the biggest differentiators TIBCO has compared to other middleware vendors is the cloud-first strategy, the model the TIBCO® Cloud Integration platform is built on. Compared to other middleware platforms, the developer productivity improvements we are seeing are very, very significant—between 20 to 35%.”

—Pandu Prudhvi, Practice Director, Integration and Custom Development

Apps Associates »
Objectives

1. Deliver an innovative, business-focused product that allows for monitoring and sharing of customer information.
2. Enable fast, reliable, flexible content delivery.

Solution

- TIBCO Mashery®

Business Outcomes

1. A game-changing strategy providing faster information delivery and better service for subscribers who depend on the information for automotive service, maintenance, and repair.
2. Increased data security and protection that drastically reduced online content piracy.
3. Greater efficiencies that shifted work efforts to allow for increased innovation, new benefits for customers, and new business opportunities.
4. Increased content delivery from just a few thousand to 40,000 customers around the world.

“From the beginning, Mashery was able to help us tackle our structural data issues to meet our technical and business goals. Mashery quickly understood where Autodata fits within future IoT data opportunities.”

—Max Lienard, Head of Product and Market Development

Banco Sabadell

- **Industry:** Financial Services
- **BMAD:** SAB
- **Founded:** December 31, 1881
- **Employees (2013):** 17,500

**REUCED**
Transaction time and operations time-to-market

"These integrations are related to the strategic architecture. Our TIBCO architecture is the foundation for the projects that will roll out for an omni-channel, customer-centric user experience."

—Jordi Planas, Chief Architecture and Methodology Director

**Objectives**

1. Deliver top-quality financial services and the best customer experience possible through a new digital banking model.

**Solution**

- TIBCO ActiveMatrix® Service Grid
- TIBCO ActiveMatrix BusinessWorks™
- TIBCO Rendezvous®
- TIBCO Enterprise Message Service™
- TIBCO ActiveMatrix® BPM

**Business Outcomes**

1. Reuse of business functionality in a standardized way, increasing productivity of new application development.
2. Improved operational efficiency with reduced transaction time and operations’ time-to-market, helping the company meet its digital banking goals.
3. A new foundation for delivering an omnichannel customer-centric user experience.

Banco Sabadell »
Objectives

1. Proactively identify customer needs across all channels and deliver relevant real-time offers to personalize the banking experience.

Solution

- TIBCO ActiveMatrix BusinessWorks™
- TIBCO Spotfire® Desktop
- TIBCO BusinessEvents®
- TIBCO ActiveMatrix® BPM

Business Outcomes

1. All customer channels are connected to all products and services across all lines of business, which dramatically improves customer engagement and satisfaction.
2. The ability to make real-time relevant offers to customers fuels personalization and enables a 3X increase in offer acceptance.
3. Business process automations drove a 40-50% reduction in integration costs.

"The trust we put in TIBCO, the partnership and the real-time capability they provided, allowed us to continue building a great customer experience. The integration and the events capability allows us to have those relevant timely conversations with our customers across channels. We have the ability to know when the customer comes in what they’ve done previously in another channel and leverage that to continue the conversation."

—Gayle Ramsay, Vice President of Customer Analytics
Objectives

1. Enable a broad spectrum of oil and gas customers, from beginners to very advanced data scientists.
2. Help clients get to the most important insights quickly and efficiently and make very important decisions just as fast.
3. Deliver three types of services: training, templates that give users an advanced starting point for applying analytics to common use cases, and advanced data science techniques.

Solution

• TIBCO Spotfire®

Business Outcomes

1. Customers’ appreciation that they can enrich their data with custom calculations or advanced data science that then becomes part of the data for easy use in visualizations.
2. For one client, forecasting time reduced to minutes or hours because of the change from paper and spreadsheets to intuitive, visual Spotfire displays.
3. A customer platform for advanced analytics, which includes a visual, easy-to-use interface, an unlimited statistical engine, and use of the R programming language.

“Spotfire does things that no other analytics platform can do. It’s just very easy to use, very visual, but it also combines a very powerful statistical engine for advanced modeling.”

—Andy Lathrop, Analytics Director
Objectives

1. Improve customer acquisition by providing the most innovative, customer-focused banking services.

Solution

• TIBCO BusinessEvents®
• TIBCO ActiveMatrix® BPM

Business Outcomes

1. Improved time-to-market with business process automation.
2. Ability to provide customers with a multi-channel customer experience.
3. Reduced total cost of ownership of infrastructure development activities.

BNL

• Presence: 75 countries

Objectives

1. Enable real-time decisions by providing data visibility to various public health facilities.

Solution

• TIBCO Spotfire®

Business Outcomes

1. Easy-to-understand visual information that empowers people to make the best decisions possible.

2. Fifty percent reduction in the time it takes to provide actionable information to hospital administrators.

"Our staff and our customers—who are usually donors like USAID or the South African government—now have information at their fingertips to make decisions they could never make before. That's the biggest business benefit: we empower people to make the best decisions possible."

—John Sargent, Founding Partner

Objectives

1. Improve management and processing of large volumes of diverse data to enable fast response to market events.
2. Achieve supply chain optimization in hydrocarbon markets.

Solution

• TIBCO Spotfire®

Business Outcomes

1. Analysts can easily mashup data sources and produce an analytic profile of the data in real time.
2. Data visualizations give analysts the agility they need to make informed decisions on market opportunities and improve the supply chain business.
3. The time required to turnaround trading tools has been reduced from months to days.

"To achieve supply chain optimization in hydrocarbon markets, we can now source the model and present its outputs for trading, energy projects, credit risk, and marketing, and enable opportunity identification and execution."

—Geoffrey Lakings, Market Technology Analyst
Objectives

1 Use advanced analytics to provide ocean carriers with unprecedented visibility so they can plan, apply real-time analysis to improve decision-making, and act quickly to mitigate disruption.

Solution

• TIBCO Enterprise Message Service™
• TIBCO ActiveMatrix BusinessWorks™
• TIBCO Spotfire®
• TIBCO BusinessEvents®

Business Outcomes

1 Reduced time to market and attained the ability to deliver exactly what customers need by co-designing custom analyses and dashboards with them.

2 In the past 18 months, a 4X increase in vessels monitored due to high throughput, low cost to scale, and faster time-to-market.

3 Improved customer cost efficiencies by helping ocean carriers reduce fuel consumption by up to 3.5% over the past two years via the vessel speed and route monitoring application built on TIBCO.

“With our real-time event processing and detection engine, one carrier reported that 90% of their vessel schedule updates can be completed within an hour, where with the previous mechanism, it was only 32%.”

—Ralph Ho, Senior Manager, Customer Integration

Objectives

1. Create a dependable and flexible API management system that provides front-end elasticity.
2. Create a service that works across a complex range of vehicles, devices, and telco data interfaces.

Solution

• TIBCO Mashery®

Business Outcomes

1. Flexibility to deal with varying product and business development cycles using the Mashery infrastructure.
2. Ease of onboarding customers who may not have programming assistance, providing credibility and flexibility.

"We were already talking to automakers and insurers, so having an API management system that had some external credibility and the right kind of flexibility so that a super-hardcore developer could jump right into it was a plus."

—Bret Tobey, CEO and Founder

Objectives

1. Achieve compliance with the Health Insurance Portability and Accountability Act (HIPAA) by monitoring user activity across the entire network to identify security incidents and maintain an audit trail of system access.

Solution

• TIBCO LogLogic®

Business Outcomes

1. Improved the internal customer experience by providing the required log reports.
2. Reduced cost through streamlining architecture.
3. Increased agility by re-using infrastructure.

"In our remote offices around the world, virtual infrastructure already exists. With the virtual appliance, we don’t have to procure new hardware / appliances, we don’t have to ship equipment, we don’t have to go through the financial procurement process. It makes everything much easier. Everything moves faster. By deploying LogLogic virtual appliances, we have the agility we need to get projects done on time."

—Nichole Windholz, Senior Security Manager
Objectives

1. Transform the company to work in new ways and bring agility and cost reduction while focusing on quality.
2. Enable straight-through processing for credit card applications.

Solution

- TIBCO ActiveMatrix BusinessWorks™
- TIBCO Enterprise Message Service™
- TIBCO ActiveMatrix® BPM

Business Outcomes

1. Flexibility to implement solutions in several markets while varying some parameters, a key enabler of the CEO’s company strategy.
2. Significantly reduced credit card processing time, with card preapproval provided in 10-12 minutes and card delivery to the door step provided in two days.
3. Cost reduction through agile production cutovers of 24,000 man days of code for more than 10 countries across Asia in one weekend without issue.

“"It used to take six months to deploy new processes. We now do four major releases a year, and one monthly minor release and have the capability to do a production cut over to more than 10 countries across Asia in a single weekend—24,000 man days of code gets deployed without issues.”

—Himanshu (HeMan) Shrivastava, Director of Applications
**Citibank Brazil**

- **History:** 2015 marks 100 years in Brazil
- **Reach:** 20 cities, 79 branches
- **Awards:** 2014 IBRC “Best Bank”

50% Increase in sales force productivity

"What we needed most from TIBCO were the capabilities from its combined technology solutions: business process management, analytics, and integration services. With these, we can resolve a lot of different business problems at Citibank.”

—Roberto Mercadante, Senior Vice President, Operations and Technology

---

**Objectives**

1. Go digital to increase competitiveness against other large banks and improve customer satisfaction.
2. Eliminate inefficient manual processes and consistently measure results.
3. Reduce operational risks such as fraud, customer churn, and loss of control over processes.

**Solution**

- TIBCO ActiveMatrix® BPM
- TIBCO Spotfire®
- TIBCO ActiveMatrix BusinessWorks™
- TIBCO Enterprise Message Service™
- TIBCO Professional Services

**Business Outcomes**

1. Digitalization enables a 20% increase in the time managers spend on client-facing activities, improving the customer experience.
2. Analytics is now the common language between IT and the business, driving faster time to insight and action with less involvement from IT.
3. Account opening cycle time has been reduced by 70%.

Objectives

1. Provide more intelligent information to improve business decision-making and service delivery.
2. Automate business decisions to increase revenue and keep costs down.

Business Outcomes

1. Real-time data provides additional insight into the business to enable change readiness, network-wide optimization, and reduced planning time.
2. Automated business processes, which were impossible before, enable more accurate business decisions, which help reduce costs.

Solution

• TIBCO BusinessEvents®

"What we found with this new world of event-driven architecture and complex event processing is that we can automate business processes that were impossible before. They were only in the brains of the experts."

—Maja Tibling, Principal Enterprise Architect
Objectives

1. Expand the bank’s Circle of Intelligence BI platform to provide visualizations that make complex data accessible and easy to understand.

Solution

• TIBCO Spotfire®

Business Outcomes

1. Bank employees can easily develop rapid, up-to-date analyses and share insights to address pressing issues about the market and customer behavior.

2. Insight on account opening and closing processes and customer dialogue provides new knowledge fast, leading to better customer service.

3. A new service-oriented customer approach that redefined customer onboarding processes enables reduced advertising costs.

"The feedback on our analyses was totally positive. The visualizations bring the data to life. Spotfire leads users intuitively to surprising and valuable knowledge."

—Jörg Neumann, Director, Business Intelligence

**Objectives**

1. Improve operational efficiencies, collapse multiple trading systems into one, leverage cloud technologies, and rationalize all data.

**Solution**

- TIBCO StreamBase®

**Business Outcomes**

1. Improved client onboarding and trade executions globally.
2. Built a compliance surveillance system with the ability to detect noncompliant practices in real time, where before it took until the next day.
3. Enabled culling of 500 million daily messages down to 1,000 meaningful alerts that can be managed very efficiently and proactively.

"We're using StreamBase for two of our key products right now, and it's really making the workflow for our internal traders and customers much more efficient."

—Ann Neidenbach, CIO
Objectives

1. Transition to a more agile reporting and data handling system to satisfy clients’ growing needs for timely information.
2. Differentiate from the competition by offering clients real-time data attuned to experience, not tasks.

Solution

• TIBCO Jaspersoft®

Business Outcomes

1. Increased competitiveness as demonstrated by customers who have stated that CTI’s solutions and reporting capabilities are far superior to competitors.
2. Reduced overhead 70% because maintaining Jaspersoft reports enables a 20 to 30% time savings.

“Jaspersoft is providing new and innovative options that we can pass on to our clients, and it’s really exceeded our expectations in a lot of ways. Customers have told us that our solutions and reporting capabilities are far superior to our competitors.”

—Rick Daffron, Founder and CEO

CTI Solutions

• Headquarters: Portland, OR

70%

Reduction in overhead with Jaspersoft
Objectives

1. Enable organizations to predict emerging threats; fortify cyber defenses; detect malicious activity in real time; and prevent, prioritize, and rapidly respond to security breaches.
2. Use fast and accurate log analysis to respond to incidents with insight into what has and will happen in order to craft a response that minimizes business impact.
3. Become clients’ trusted security advisor by providing complete solutions.

Business Outcomes

1. The ability to find, contain, and eradicate threats faster with highly optimized processes and technology based on a wide range of LogLogic physical and/or virtual appliance deployment options.
2. The ability to stay close to clients, listen to their security problems, and build services that bring together people, processes, and technology to protect and enable them in the face of extensive security threats.
3. A TIBCO partnership that has gone to the next level, enabling joint business growth of more than 200%.

Solution

• TIBCO LogLogic®

“TIBCO worked hard to help us fit its technology into our sales model and provide it in a way that meets clients’ technical and budgetary requirements. We provide a wide range of deployment options using LogLogic, and TIBCO provides us with great behind-the-scene sales support.”

ALL
TIBCO technologies now accessible for rapid experimentation

“TIBCO Cloud Integration builds on all the TIBCO strengths and foundational services and enables rapid experimentation with APIs, which focuses the conversation and understanding of expectations between business and IT.”

—Rick Fish, CEO and Founder

Objectives

1. Provide a cloud solution for clients that allows for faster experimentation and closer alignment between the business and IT.
2. Help clients reduce “shadow IT” by recommending tools and assets that can help their process and sustain delivery over the long term.

Solution

- TIBCO Cloud™ Integration
- TIBCO Mashery®

Business Outcomes

1. Increased customer adoption of cloud solutions, enabling them to reduce deployment time and increase experimentation.
2. Attained the confidence to build workflow services, streaming data services, API management, and further connectivity to bring assets together and deliver full end-to-end solutions.

Digital Nebula »
Objectives

1. Provide an infrastructure where cloud-based services, like weather and security, and events coming from the Internet of Things can be used to enable smart homes at low cost.

2. Meet the privacy and security requirements of the homeowner.

Solution

- TIBCO® Cloud
- TIBCO BusinessEvents®
- TIBCO® API Exchange Gateway

Business Outcomes

1. Integration with home Internet of Things devices for reliable two-way communication and easy smart homeowner control of their environment anywhere, any time.

2. A reliable customer experience that is evolutionary, low cost, secure, and private.

3. Significant increase in customer adoption of the ClearView CRM offering.

4. Overall improvement in user experience, improved workflow, and faster results for ClearView CRM customers.

"We’re providing real-time services all over the house and making it smart, really smart. We started in Switzerland, Austria, and Germany, and we’re now expanding through Europe and into mega-cities in Asia — to countries depending on their openness to smart homes. With our back-end systems, it’s no concern if we grow fast."

—Martin Vesper, CEO
Objectives

1. Improve the health of policyholders and reward them when they meet their goals via the Vitality wellness platform.
2. Establish the Vitality platform as the world’s best-in-class wellness solution.
3. Provide a common, standardized, secure, global integration platform that gives clients the ability to call back-end services from multiple locations.

Solution

- TIBCO ActiveMatrix BusinessWorks™
- TIBCO Enterprise Message Service™
- TIBCO Spotfire®

Business Outcomes

1. In partnership with Apple, release of the Active Reward solution globally, giving members a free Apple Watch that’s fully covered by the Vitality program if members meet their exercise goals.
2. Improved and expanded relationships with large life insurance companies globally.
3. In each country, standard services that facilitate work with 10+ partners, reducing workload by as much as 80% via reusability.

"If you’re collecting multiple device states globally, you need to ensure that these events are captured and are not going to be lost, that you have guaranteed delivery. TIBCO messaging with queuing mechanisms and asynchronous delivery was one of our requirements."

—Neil Adamson, CIO

Equifax

• Founded: 1899
• Headquarters: Atlanta, GA
• Employees: 9,200
• 2015 Revenue: $2.7B
• Operations: 24 countries
• Data assets: 820 million consumers, 91 million businesses

75%
Time-to-market improvement

“Sales teams have been able to provide valuable insights to customers because, over the past year, we’ve moved from a very manual environment in which it used to take weeks to develop and deliver insights to one that’s now 100% self service.”

—Brandon Obenauf, Data Strategy and Execution Analyst

Objectives

1 Become a thought leader and provider of dynamic insights within the credit space to help clients make the right decisions for their customers.
2 Blend business and technology in a way that business users and decision-makers can access shared insights without needing the technical skills.
3 Quickly share insights with sales consultants so they can provide more value to customers.

Business Outcomes

1 Launched the Cambrian Project that used Spotfire as a key component for enabling true thought leadership, differentiation, and market share growth.
2 Improved customer experience by enabling sales consultants to pass on insightful reports to clients.
3 Transitioned from a company that supplies data to one that supplies dynamic insights, helping to improve brand image and meet or exceed customers’ expectations.

Solution

• TIBCO Spotfire®

Objectives

1. Demonstrate the value of services and information to customers.
2. Empower the sales force with real-time data to support customers in making the right decision at the right time.
3. Enable straight-through processing for credit card applications.

Solution

- TIBCO ActiveMatrix BusinessWorks™
- TIBCO Enterprise Message Service™

Business Outcomes

1. The ability to show information to customers during sales calls improves interactivity, transparency, and trust.
2. An empowered global sales team that can access customer data from multiple lines of business helps structure the decision for the customer.
3. Significant improvement in sales force productivity and enhanced view of customer data shortens the sales cycle.

"With the Smart Knowledge software we are developing for tablet computers, and the connectivity provided by BusinessWorks, a sales person can show data graphically so a prospect can see what we provide. It provides transparency."

—Olivier Lehe, head of IT connectivity, innovation, CRM, and websites

“Another big target was to reduce the amount of time for online auto loans. By re-using services that we wrote for account opening, we accelerated that project from three-years to half that time.”

—Dan Hudson, Manager of Systems Integration Architecture

Objectives

1. Enhance products and create efficiencies enabling better and faster service to customers.
2. Reduce the applications portfolio, streamline integration between systems, and quickly integrate systems from newly acquired banks.
3. Reduce technical debt.

Solution

- TIBCO ActiveMatrix BusinessWorks™
- TIBCO Enterprise Message Service™

Business Outcomes

1. Conversion of a paper-based credit card application process into an online form used across multiple channels, allowing customer approvals within 60 seconds.
2. Significant improvement in workforce productivity and credit card opening time, reducing an 18-month roadmap item into an 18-week project.
3. Reduced technical debt and decreased time for online auto loan approval.
Objectives

1. Figure out which channels and programs viewers are watching, and monetize content there.
2. Break down data silos and combine internal and third-party data, then leverage business intelligence tools to allow business partners to become more effective and efficient.

Solution

- TIBCO ActiveMatrix BusinessWorks™
- TIBCO Enterprise Message Service™

Business Outcomes

1. Significant improvement in inventory effectiveness, including the ability for viewers to see only promotions relevant to them.
2. The ability to move with the marketplace by supplying and monetizing content through various distribution systems.
3. Fulfillment of new contractual requirements with cable and satellite video program distributors and the ability to feed them updated program information and scheduling data in real time.

“TIBCO will allow us to gather data from various distribution systems, which will allow us to monetize content as a collective in a dynamic marketplace. Already we have become much more knowledgeable about how to appropriately and effectively promote our content.”

—Ben Hope, CIO

Fox Networks Group

- Parent: 21st Century Fox
- Broadcasting: 35 languages, 350 channels, 11 cable networks
- Viewers: 1.7 billion

30–50 Manual processes eliminated, enabling reduced cost and increased value
Objectives

1. Transform the sales and operations planning (S&OP) process across all hubs.
2. Maximize valorization of the milk supply.
3. Evolve to Gartner S&OP Level 3 in which business decisions are based on value and the complete financial impact.

Solution

- TIBCO Spotfire®

Business Outcomes

1. A new business model enabled by Spotfire implementation in all 10 S&OP hubs, allowing company-wide data and planning KPI standardization.
2. Inventory optimization and viewing of complete in-store inventory levels at any time, laying the foundation for optimal valorization.
3. Spotfire increased speed and powerful analysis enabling evolution to Gartner Level 3.

“We are transforming our planning processes, and Spotfire is enabling that by ensuring that complex data now becomes visible in a common, more actionable way, and new insights can be derived that enable people to make better business decisions.”

—Erwin Logt, Corporate Director, ICT
Objectives

1. Reduce consulting implementation times and provide client operations monitoring.
2. Provide clients with turn-key, web solutions for fast identification of performance improvement opportunities.

Solution

- TIBCO Spotfire®

Business Outcomes

1. Faster implementation time for recommended operational improvements enables handling more clients with the same number of consultants.
2. Spotfire guided analytics allows helping clients identify and quantify problems, determine why the problems occurred, and plan how to correct them.
3. The convenience and power of the cloud solution supports strengthening client relationships, leading to expectations for doubling the business.

"Using Spotfire to build guided analytics solutions, we’re able to quickly identify and quantify problems, point out why problems occurred, and also how to correct them. This is invaluable in the healthcare industry."

—Mitchell Goldstein, Director in Health Solutions Practice

$8 MILLION
Savings achieved for a 300-bed hospital by increasing productivity 9% and reducing overtime 14%
Objectives

1. Visualize data to understand who is using the company’s products and why.
2. Understand the cost of building products and their associated revenue.
3. Discover the most effective marketing channels and the impact that products have.

Solution

• TIBCO Spotfire®

Business Outcomes

1. Identification of new use cases, in some cases showing increased business value for users of 2X.
2. The ability to capture all data points allowing development of the product story that shows revenue generation as well as improved operational efficiency.
3. Insight that enables fact-based decision-making and drives optimal investments. Spotfire visualizations provide understanding of marketing channels that ultimately saves money.

“I knew Spotfire was powerful enough to give us answers. The trust we put into TIBCO is giving our stakeholders better confidence in our ability to generate solutions that provide business value.”

Objectives

1. Improve competitiveness and customer acquisition by sending personalized credit card offers to customers and prospects.
2. Improve customer satisfaction and customer experience.

Solution

- TIBCO BusinessEvents®
- TIBCO Spotfire®

Business Outcomes

1. Delivered the Smart Offering project built on a real-time marketing platform that analyzes customers’ card transaction data and sends optimal offers in real time.
2. Improved customer satisfaction, increased customer credit card use, and gained incremental sales of ~$600M in one year.
3. Achieved 10X increase over competition with ability to run >300 campaigns simultaneously.
4. Enabled marketers to design campaigns directly and simply, reducing dependence on IT.

"We can analyze for when customers use their card, where they use it, and why—all in real time and act on that information, also in real time. This is based on technical innovation. We are at least five years ahead of our competitors in marketing skills."
—Jaehoon Park, Head of Big Data Strategy Center

2X Increase in trading volume

"We were first to use streaming analytics software in Turkey, which enabled us to integrate different platforms—data from up to 25 institutions—into one real-time big data stream. With the help of TIBCO StreamBase, we increased FX volume, and we became the first bank in Turkey to provide a Gold Exchange market."

—Abdulkerim Ozcan, Senior Trader

Objectives

1. Efficiently increase trading volumes and the customer base to increase profits.
2. Overcome IT and workforce limitations with a user friendly solution.

Solution

- TIBCO StreamBase®

Business Outcomes

1. Trading volume increased from 250 million a day to between 500-600 million a day, and the customer base has grown more than 100%.
2. Integration of data from up to 25 institutions into one real-time big data stream facilitated an increase in FX volume, and made KT the first bank in Turkey to provide a gold exchange market.
3. Cost reduction, increased efficiencies, and an easy to use system helped create a more skillful and engaged workforce.
Objectives

1. Automate systems to facilitate migration from the wholesale and enterprise sectors to the retail market.
2. Support the operating companies within the Liquid Telecom group.
3. Enable low-friction integration of legacy systems and set up some green field projects architected for future growth and development.

Solution

- TIBCO ActiveMatrix BusinessWorks™ 6
- TIBCO Enterprise Message Service™
- TIBCO ActiveMatrix® BPM
- TIBCO® Fulfillment Provisioning

Business Outcomes

1. Much smoother development cycles, with better testing, and easy-to-automate build and deployment cycles.
2. Simplification of business processes and more full-featured functions to the operating companies.
3. Greater visibility, fewer errors, the ability to escalate issues when required, and improve standardization to support future growth.

“Liquid Telecom has received a large amount of value from leveraging TIBCO Professional Services. They have understood our problems and brought a significant amount of technical knowledge and advice.”

—John Oxley, Development Team Leader
Objectives

1. Transform the way theater tickets are bought and sold by creating a real-time view into box office allocations.
2. Improve the customer’s buying experience.

Solution

• TIBCO Mashery®

Business Outcomes

1. Added significant sales value with a secure booking engine, interactive seating plans, customer reviews, and real-time availability.
2. Enabled new partners to brand a fully functional website and quickly and easily jumpstart ticket sales.
3. Secured the ability to develop innovative partnerships using its leading platform providing benefits and features not offered by any other ticket agency.

"With our open APIs, we saw a huge increase in tickets sold, and a +500% increase in the value of those ticket sales. Mashery rocket-boosted our existing API to take advantage of our sales platform."

—Co-founder, Francis Hellyer

Objectives

1. Develop the most innovative mobile application features geared for the millennial market, integrate with social networks, and add image search.

2. Get data to customers quickly so they can find what they need right away.

Solution

- TIBCO Mashery® Cloud

Business Outcomes

1. Greater reach within the millennial market with APIs that make it easier for developers to spin up new products, including image search within the iOS app, allowing customers to find the item at Macy’s and do an in-app purchase.

2. Much faster customer service and the ability to provide recommendations to customers, which increases customer satisfaction.

3. Improvements to the checkout experience, which is now faster and easier due to the newest APIs; increased conversion rate.

“Holidays are the biggest time for sales, and we have to make sure we’re able to scale for those increased API calls. Mashery reports have been crucial in preparing for the right amount of servers to handle the traffic, which is critical for our business.”

—David Moyer, Head of API Management, macys.com
Objectives

1. Continue the excellent relationship established with members.
2. Strengthen growth of subsidiaries and affiliates and improve performance across all channels.
3. Develop IT agility and modernize systems to accelerate time to market.

Business Outcomes

1. A 2015 TIBCO Trailblazer Award for revolutionizing its IT architecture and enabling a consistent customer and partner experience across all channels.
2. Collaborative economics and its partner ecosystem have led to an increase in performance by subsidiaries and affiliates.
3. Significantly reduced time to market and an IT infrastructure that enables 100% of estimates to produce the same results on all channels.

Solution

- TIBCO BusinessWorks™
- TIBCO Enterprise Message Service™
- TIBCO® API Exchange Gateway

"The significant improvement we made was that 100% of our estimates are producing the same results on all channels. For us, it’s a tremendous achievement. We know we will be able to get new, expanded services to market faster to meet member needs."

—Benoit Louis, Middleware, Consulting and Support Manager
Marks & Spencer

- London Stock Exchange: MKS
- Member: FTSE 100

5X
Reduction in IT resources and time needed to support business analysis

"With Spotfire, we have the confidence that when a customer goes into one of our stores, they can see the product they want and buy it. The solution helps to ensure M&S is number one."
—Pete Williams, Head of Enterprise Analytics

Objectives

1. Empower business analysts to enhance decision-making.
2. Fundamentally change the culture of IT.
3. Drive operational efficiency and IT resource optimization.

Solution

- TIBCO Spotfire®

Business Outcomes

1. Business decisions are now data-driven, an improvement that has fundamentally changed the IT-business relationship.
2. Data visualizations improve inventory forecasting, so customers will be able to get the product they want on the spot.
3. IT resource and time needed to support business analysis have decreased 5x.
Objectives

1. Transform into a smart airport and seamlessly accommodate passenger volumes that are expected to increase substantially.
2. Create a centralized operations center that manages all airport operations and provides real-time situational awareness and control.
3. As passenger volumes increase, evolve the customer journey from reactive to proactive to predictive.

Business Outcomes

1. Improved the customer journey with more improvements planned.
2. Delivered the situational awareness platform in a very compressed timeframe, providing a flexible foundation for increasing operational efficiencies.
3. Launched an airport live map that’s updated in real time showing aircraft, service vehicles, and assets like gates and baggage carousels.

Solution

- TIBCO ActiveMatrix BusinessWorks™
- TIBCO® Live Datamart
- TIBCO StreamBase®

"Resolving some of the challenges allowed us to move ahead with the opening of the T4 terminal in a far more operationally efficient manner, without major increases in staffing. We’ve also been able, in many instances, to improve the customer journey through the airport."

—Vic Raymond, ICT Strategy, Planning, and Architecture Manager

$1M Cost savings in infrastructure projects
Objectives

1. In the shortest time possible, turn consumer, market, and platform insights into actionable recommendations for clients.
2. Access data anywhere from a mobile phone, tablet, or laptop.
3. Find an analytics solution that could be used by anyone from day one and that would be suitable for boardroom presentations.

Business Outcomes

1. Fifty percent reduction in report generation time.
2. Improvement in workforce efficiency and better business outcomes for clients and partners.
3. Better client relationships with new abilities to help grow their businesses.

Solution

- TIBCO Spotfire®

“We evaluated a variety of solutions, such as Tableau and Microsoft, and they all had their own strengths and weaknesses, but we needed a solution that could deliver true real-time insights inside a single platform. TIBCO Spotfire has the best workflows—from exploration to modeling and advanced visualizations.”

—Benjamin Spiegel, CEO
Objectives

1. Provide more reliable and better services to customers and stakeholders via the “Virtual Train” project.
2. Launch a platform to unify multiple train types and many IT environments to make the Virtual Train project possible.

Solution

- TIBCO ActiveMatrix BusinessWorks™
- TIBCO BusinessEvents®
- TIBCO ActiveSpaces®
- TIBCO Enterprise Message Service™

Business Outcomes

1. Using on-board sensors to transmit data on-shore, delivered a mobile app enabling passengers to see train locations and open seats, thereby improving the customer experience.
2. Became the only train company in Europe to standardize IT on all trains and deliver new applications.

“We’ve made a mobile app so people can see train locations and where the open seats are. We have a lot of sensors on the train, and we transmit that data on-shore, even from older trains. The solution has made it possible to improve our business and our customer experience.”

—Wim Liet, Program Manager for IT on Trains

300% Increase in advertising revenue

"We talk about APIs enabling the art of the impossible because we can now deliver products that attack different advertising markets. That wasn't possible before, to actually attack advertising markets that we wanted to attain, but also to really drive the product evolution to sustain and grow a subscription business. The Mashery APIs really allowed us to reduce the barrier of market experimentation."

—Myles Lagolago-Craig, Head of Digital Platforms

### Objectives

1. Transform the business to outpace competitors in mobile and digital.
2. Keep consumers engaged across devices and brands, increasing News Corp and advertiser reach and revenue.
3. Unlock the value of editorial assets to chase the new value landscape.

### Business Outcomes

1. Successfully launched cross-platform apps for major brands.
2. Used APIs to reduce time to market from months to multiple releases per day.
3. Increased daily API calls from two to nine million over the last three years.
4. Greatly expanded distribution channels while increasing agility with no disruption for internal or external users.

Objectives

1. Improve operation and cost efficiencies, especially when oil prices are low.
2. Answer questions fast to optimize production, decide on acquisitions, and ultimately move the business forward.
3. Attain an automatically updated system that could integrate with Spotfire to handle billions of rows of data.

Business Outcomes

1. Improved efficiency with the ability for engineers, economists, and geologists to work in the same software package and build solutions in minutes versus days.
2. Improved ability to visualize the results, quickly ascertain whether the assumption is valid, and speed decision-making.
3. Time savings for employees across the company, enabling them to solve challenging problems using live data from Spotfire and Hadoop.

Solution

• TIBCO Spotfire®

“Using Spotfire, we have constantly improved efficiency because everybody can work in the same software package whether they’re an engineer, economist, or geologist. We can answer questions and build solutions in minutes that otherwise would take hours or days.”

—Team Lead, Analytics and Information Architecture
Objectives

1. Reduce costs and improve operational efficiencies by streamlining back-office functions.
2. Remove application silos to improve customer communication.
3. Become more knowledgeable about customer needs.

Solution

- TIBCO ActiveMatrix BusinessWorks™
- TIBCO BusinessEvents®
- TIBCO ActiveMatrix® BPM

Business Outcomes

1. A reduced IT footprint significantly cut operating expenses.
2. Customers now receive communications through their preferred channel.
3. Better customer experience with a single view of the customer, an authoritative source of information to support personalization and drive down cost.
4. Marked improvement in the response to changing conditions and delivery of new products and services.

"Our services-oriented architecture is much more flexible than the old brittle integration architecture we had. We now get much better solutions, and the cost of delivering them goes down, plus our time to market is much better."

—Scott Edie, Manager of Application, Fechnology, and Security Architecture
Objectives

1. Even with the oil and gas industry’s current challenges, achieve growth by analyzing and acquiring valuable assets at lower evaluations.
2. Give decision-makers 24/7 access to data so they can analyze at the granular level and make decisions that will ultimately improve profitability.
3. Leverage talent and build development inventory by finding high quality acquisition candidates.

Business Outcomes

1. More efficient acquisition of the highest performing areas by combining mapping, decline curve analysis, and data analytics.
2. Implementation of a template that brought decline curve analysis into Spotfire to improve efficiency of reserves analysis.
3. More efficient identification of poor performing wells and enhanced cash flow through the ability to address problems with workovers or recompletions.

Solution

• TIBCO Spotfire®

“The engineering department is using Spotfire to put our fingertips on the data we need to help the company maximize its assets. It’s really having an impact on overall profitability.”

—Brent Haas, Vice President of Engineering
Objectives

1. Maintain leadership in the insurance industry by increasing the depth of the offering and by meeting customers’ long-term objectives for robust analysis.

2. Partner with a BI expert to enable maintaining data security, paramount in the financial services and insurance industries.

3. Reduce support and development demands on the support team and provide software that is easy for customers to use.

Business Outcomes

1. New insights and reports supply a strong voice within a specialized market and increased credibility.

2. New personalized safety programs allow customers to reduce risk, made possible by identifying customers with similar profiles and common risk exposures.

3. Significant decrease in the amount of effort needed for support and maintenance provides an immeasurable improvement in the customer experience.

Solution

- TIBCO Jaspersoft®

"We’re constantly asking ourselves what is best for customers, and we knew that choosing what was best for them would maintain our leadership position. We kept our customers happy and continued growing our competitive advantage with Jaspersoft."

—Sean Banikin, Vice President, Risk Control Technologies

Scandinavian Airline Service

- Rank: Largest airline in Sweden
- Passengers: 28.4 million (2013-14)
- Destinations: 1,321 in 193 countries
- Daily flights: 18,500

REAL-TIME MESSAGING

The key to smooth flight operation
Objectives

1. Integrate multiple technology systems on a platform that delivers scalability for data exchange and business processes.
2. Preserve the speed provided by point-to-point interfaces while reducing costs.

Solution

- TIBCO ActiveMatrix BusinessWorks™
- TIBCO Enterprise Message Service™

Business Outcomes

1. Improved data quality and reliability and eliminated onboarding disruption and countless validation procedures.
2. Eliminated multiple management requirements, increased flexibility of systems, and improved cost efficiency.
3. Implemented over 1,000 data flows between more than 45 partners in less than one year.

“Deduplicating actions between data producers and data subscribers allows us to increase flexibility of systems and improve cost efficiency.”

—Gwenaël Lechat, SEG Project Manager

Objectives

1. Deliver enhanced analytics to customers via the SofTrek ClearView CRM solution and improve usability, satisfaction, and adoption.

Solution

- TIBCO Jaspersoft®

Business Outcomes

1. Seamless business intelligence.
2. Shorter development cycles.
3. A more competitive solution.

"With our ability to deliver BI content to our customers in a timely fashion, they can make more informed and accurate decisions for their business."

—Robert Girardi, CEO

SofTrek

- Industry: Application software
- Founded: 1987
- Experience: More than 25 years
- Headquarters: Amherst, New York

50%
Reduction in time to market
SunGard

- 2014 Revenue: $2.8 billion
- Employees: 13,000
- Customers: 14,000
- Headquarters: Wayne, PA

DECREASED
Operations overhead, development, support

"Our main two objectives were accuracy and speed, and TIBCO MDM is allowing us greater governance over authoring and updating of information. Data then becomes more reliable, so we don’t have to spend time double- and triple-checking for reporting. We’re putting information in our data warehouse that users can rely on. And we’re providing a quick return, which is what they want."

—Daniel Newbern, Senior Director for Enterprise Projects

Objectives

1. Consolidate data to get one view of a customer.
2. Deliver one story about a customer, efficiently arming the executive and sales teams.
3. Obtain technology that would allow better and easier integration of systems and allow building a better data repository and better reporting.

Solution

- TIBCO® MDM

Business Outcomes

1. One solid view of the customer that enables insight into their activity, an improved customer experience, and better targeting for up-sell/cross-sell opportunities.
2. Stronger reporting for business groups and executives allowing better business decisions related to operations and customers.
3. Greater governance over authoring and updating of information so data is more reliable, and users get a quick return.

Objectives

1. Facilitate digital business transformation through merging and consolidation of the IT platform.
2. Connect people from various divisions who need to create solutions for the whole company.

Solution

- TIBCO ActiveMatrix BusinessWorks™
- TIBCO Enterprise Message Service™

Business Outcomes

1. Integration of more than 120 IT applications and implementation of over 650 integrations, providing a great foundation for digital business transformation.
2. Design, implementation, and testing of functional flows within several business units, facilitating internal cohesion and helping manage the digital business transformation.
3. Lower IT TCO by reducing effort and cost using a common, standardized integration infrastructure.

“Not only do we have an IT architecture, we also have the possibility to evolve it in a more cost effective way and provide a foundation enabling people to establish business and IT transformation.”

—Luciano Aprile, Head of Enterprise Application Integration Development
Objectives

1. Bring together disparate customer-facing and back-office systems to help deliver products and services.
2. Streamline the multiple start-stop process of customer security event reporting, case creation, evidence submission, and evidence collection.

Business Outcomes

1. A streamlined case management process decreasing time spent for data collection by 50 to 60 percent.
2. Increased customer satisfaction and engineer productivity.
3. Faster time to market.

Solution

- TIBCO BusinessWorks™
- TIBCO® Managed File Transfer

"With the trust that we put in the TIBCO toolset, we’ve been able to provide our customers a much more seamless experience, much more efficient mechanisms by which they can interact with Symantec."

—Mannie Heer, Senior Director, IT Applications
Objectives

1. Help clients leverage a platform for data analytics and give them the ability for very smooth and fluid analytics leading to insight.
2. Enable clients to leverage the power of their data with an easy to use tool for multiple user types that provides enterprise-class scalability.

Solution

• TIBCO Spotfire®

Business Outcomes

1. Sixty percent year-over-year growth and projected 100% growth in the coming year.
2. Spotfire established as the primary go-to-market tool, with its ease of use and scalability enabling completion of over 100 projects across many industries.
3. Many customer insights and excellent results from data analyses.

“Spotfire has helped us tremendously and has had a significant impact on our business. It has helped us grow into a more focused and mature data analytics company.”

—Rishi Bhatnagar, CEO

Syntelli Solutions

• Founded: 2005
• Headquarters: Charlotte, NC
• Clients: >100

60%
Year-over-year growth due to Spotfire projects
Objectives

1. Transform IT so it can enable new products and services and new ways to provide those products and services quickly and with pricing flexibility.

2. Create a more flexible pricing engine that can return quotes to customers as quickly as possible to gain a competitive advantage.

Solution

- TIBCO ActiveMatrix BusinessWorks™ 6
- TIBCO Enterprise Message Service™

Business Outcomes

1. Implementation of a new lead pricing service helped IT integrate a new product called Radar Live and apply a new pricing engine for the insurer business.

2. The new pricing service manages 35 pricing transactions per second and delivers quotes in 1.5 seconds, 75% faster than the target SLA.

3. IT and business teams now have a trusted, strategic relationship.

"We wanted our development community to get hands-on with the technology and test it with minimal supervision to see how complex it would be to implement. TIBCO really excelled. Our developers were able to get to grips with the technology and do a number of POCs to prove it was right for us."

—John East, Head of Architecture
Objectives

1. Achieve profitable growth, obtain new customers, and make TUI the number one travel brand.
2. Facilitate the merger of TUI AG and TUI Travel PLC by consolidating applications and maintaining a high quality of service.
3. Serve customers in a very individual and unique way and provide very personalized offers based on where they are in their journey.

Solution

- TIBCO ActiveMatrix BusinessWorks™ 6
- TIBCO Enterprise Message Service™
- TIBCO Spotfire®
- TIBCO Hawk®
- TIBCO® Managed File Transfer

Business Outcomes

1. Ability to generate €50 million in revenue per day because new system and application integrations are fast and stable.
2. Ability to analyze competitor pricing and immediately make adjustments to be very competitive without giving up too much margin.
3. Fast increase in net promoter score from 41 upwards due to the ability to analyze customer trips and personalize their experience.

“Our customers benefit from TIBCO technology as we are able to provide an even better customer experience through analysis. There are a lot of services we can provide based on this analysis to make the customer experience more unique.”

—Heinz Kreuzer, CIO of TUI Central Region and CEO of TUI InfoTec

TUI Group

- Tour operators: leading brands throughout Europe
- Travel agencies and online portals: 1,800
- Airlines: 6, with more than 140 aircraft
- Hotels: over 300 with 210,000 beds
- Cruise liners: 15 (in 2016)
- 2014 revenue: €20.1 billion

€50 MILLION
Daily revenue thanks to TIBCO stability

TUI Group »
Objectives

1. Manage the explosion of real-time data from in-running (betting during the game) by collecting everything that’s going on in the industry.

2. Quickly deliver what would usually be an internal process on the client side, allowing clients’ trading floor staff to manage more transactions and more markets simultaneously.

3. Modernize with technology that prepares the company for the potentially fearsome world of betting, one much like the financial industry in which there is almost a form of warfare going on.

Business Outcomes

1. Real-time data integration provides a fast, reliable feed with enhanced features, enabling clients to manage more transactions and markets simultaneously.

2. One unified data source enables customers to choose just the data they want, increasing its relevance.

3. Data now held in memory drastically reduces latency, enabling data to be very quickly pushed to Asian and European clients without the need for databases.

Solution

- TIBCO StreamBase®

“By merging and streaming all the data on our platform, real-time and historical, customers can model, study patterns, and formulate their trading plans. They increase profitability—and that’s what it’s all about.”

—Head of Architecture
Objectives

1. Be the most efficient and prudent operator among all oil and gas companies, especially for unconventional resources.
2. Streamline data and get it into clean formats that end users can use with minimal support from IT.

Business Outcomes

1. Savings of 44% year-over-year, on the order of tens of millions of dollars.
2. Significant productivity improvements on well analysis providing results on 30 to 40 wells per second, whereas before it was one well per minute.

Solution

• TIBCO Spotfire®

“One of our most successful Spotfire use cases was reviewing costs for chemicals associated with producing wells, and in one division, we saved nearly 44% year-over-year, on the order of tens of millions of dollars.”

—Reservoir Engineer

$600,000
Anticipated OR cost savings per year due to efficiencies, plus $500,000/year in the next phase

“In real time, we are able to alert our rapid response team to go to the bedside of a patient who is likely to go into cardiac arrest. So far, we’ve successfully reduced the number of cardiac arrests in the hospital by an estimated 15 to 20%.”

—Christine Watts, Chief Enterprise Architect

Objectives
1. Deliver superior healthcare and remain a leader in the industry through advancements in medical innovation and through serving health needs.
2. Effectively share data across a large number of disparate systems by eliminating silos across technology and functional areas.

Solution
- TIBCO ActiveMatrix BusinessWorks™
- TIBCO Enterprise Message Service™
- TIBCO BusinessEvents®
- TIBCO Spotfire®

Business Outcomes
1. Cardiac arrests reduced by an estimated 15 to 20 percent.
2. Improvement in patient care due to streaming patient data from monitoring devices.
3. Reduction in re-admissions by better identifying at-risk patients using predictive analysis.

Objectives

1. Deliver a way for customers to make underlying communication technologies interoperate as if viewing through "a single pane of glass."
2. Find a customizable solution that is easy to manage and inexpensive to deliver.
3. Generate incremental revenue from exposing standard sets of customizable features.

Business Outcomes

1. Fast and easy program and portal setup.
2. Very high customer adoption leading to 112% increase in daily API calls, and more than 30% increase in product revenue.

"The Whispir API now generates more than 30% of product revenue, a percentage that continues to grow. This is a direct effect of using the API management infrastructure provided by TIBCO Mashery.”

—Jordan Walsh, Product Architect

Solution

- TIBCO Mashery®
Objectives

1. Become a leader in mobile Internet with at least 50% of revenue from data.
2. Improve the IT-business relationship by enabling faster responses to changing business conditions.
3. Improve value-added service delivery by knowing customer needs.

Solution

- TIBCO Spotfire® Desktop
- TIBCO BusinessEvents®

Business Outcomes

1. Marked improvement in customer retention and an increase in average revenue per user.
2. The ability to track revenue-generating activities, redefine operations across the network, and shift IT to a strategic differentiator.
3. Customer fingerprinting providing more targeted offers with an increase in acceptance.

“We’ve witnessed several positive outcomes from TIBCO BusinessEvents, including marked improvement in retaining customers and increased revenue per user.”

—Simeon Iheukumere, Head of IT Service Build

Objectives

1. Distinguish sales drivers from non-sales drivers.
2. Optimize the marketing budget to drive additional growth.
3. Reduce time spent analyzing and collecting data and increase time spent focused on the business.

Business Outcomes

1. Dramatic improvements to strategic retailer relations, as Spotfire enables demonstrating and setting optimal pricing.
2. Acceleration of new product distribution and an increase in sales of 15-20%.
3. A thorough understanding of the market and great visualizations facilitating communications and fueling a competitive advantage.

Solution

- TIBCO Spotfire® Cloud

"If you want to distinguish sales drivers from nondrivers in a very dynamic environment in which you’re doing a lot of things simultaneously, you must be able to collect all the information and look at it from all perspectives. You have to zoom in by region, look at trends at all the retailers. Spotfire makes these perspectives feasible. You can quickly find what is working and what is not."

—Egbert Jan Vierkant, Market Analyst
Objectives

1. Transform the business from print to online to adapt to the digital world.
2. Provide up-to-date, accurate information to customers.
3. Provide advertisers with exceptional ROI for lead generation and customer acquisition.

Solution

• TIBCO® MDM

Business Outcomes

1. Identified businesses that consumers were searching for and accurately matched these businesses with data from third-party services and its own databases.
2. Increased perceived relevance by more than 10%.
3. Improved data accuracy by correctly matching content to existing records.

"Content accuracy is what differentiates us from many other marketing companies. If we don’t have that information, we will lose consumers."

—André Boisvert, Chief Architect
