

TIBCO Managed File Transfer Command Center

Centralized management, control, and audit for all enterprise file transfers

BENEFITS:

CENTRALIZED MANAGEMENT

Browser-based, single-point-of-control for all enterprise file-transfer activity.

SECURITY

Complete data security and support for the world's most stringent encryption standards.

FULL AUDIT AND REPORTING

A full suite of online inquiry tools for powerful audit and reporting functionality.

DELEGATED ADMINISTRATION

Users empowered based on their role within the organization.

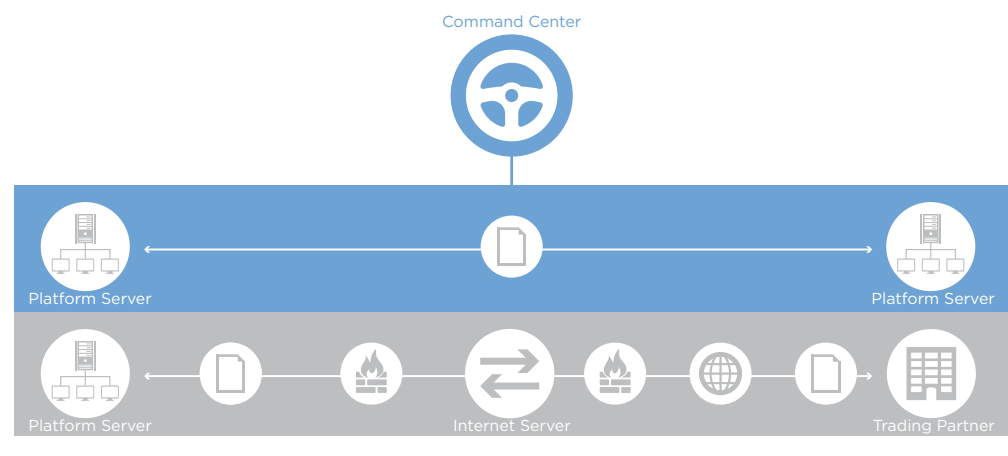

HIGH AVAILABILITY/CLUSTERING

Support for clustering for failover and reliability.

REAL-TIME ALERTS

Messages and alerts sent via phone, email, or mobile device.

TIBCO® Managed File Transfer Command Center provides a single point of control to manage all of your enterprise file transfers, both inside and outside the enterprise and across all major platforms (from Windows to the mainframe). It serves as the digital dashboard into your entire network; using a standard web browser, administrators can review and control all file-transfer activity — whether it be internal or external.

COMPLETE AUDITING AND COMPLIANCE: KEEP A PULSE ON ENTERPRISE FILE TRANSFER

In a typical network, file transfer activity occurs 24x7. Many times, it includes high volume file transfers, very large files, and users and systems spread across a broad geographic area. TIBCO Managed File Transfer Command Center gives your organization centralized access to logs for each and every transfer-related event and produces detailed reports of every aspect of those transfers. Real-time alerts can notify your personnel instantaneously as circumstances warrant so that issues can be resolved quickly.

In addition to a standard set of detailed audit reports, delegated administration and an extensive set of online inquiry tools support ongoing operational and management needs. Having these tools centrally available at all times enables your organization to achieve total control of enterprise file transfer, while maximizing efficiencies and helping satisfy compliance mandates.

SPECIFICATIONS

PLATFORMS

- Unix (IBM AIX, HP-UX, SUN Solaris)
- Windows XP SP3
- Windows Vista SP1
- Windows 7 and 8
- Windows 2008 and 2010
- Linux
- zLinux
- VMware

COMPLIANCE

- Detailed Auditing
- Section 508 Compliant
- Support for PCI, Sarbanes-Oxley, HIPAA, GLBA
