spotfireworkshop@tibco.com

Make agile business intelligence a reality and powerful, self-service analytics the norm across your organization with our half-day, on-site TIBCO Spotfire workshops. These workshops will show you how to:

- Develop a stronger BI strategy that enables IT to stay ahead of continuous data access demands
- Bring enterprise reporting and data discovery together for more agile decision-making by information consumers across your organization

WORKSHOP #1: BUSINESS INTELLIGENCE WITH DATA DISCOVERY

Learn how traditional enterprise reporting and agile data discovery complement each other to provide a cohesive BI strategy.

- Review of your current BI capabilities
- Data needs and accessibility audit
- Data discovery BI vs. traditional reporting BI comparison
- Data discovery demonstration and discussion

WORKSHOP #2: DATA DISCOVERY DASHBOARD CREATION

Improve data analysis skills across your core BI team through this hands-on workshop that steps through the creation of simple dashboards.

- Overview and introduction of Spotfire
- Review of data set and business questions that need to be explored and visualized
- Hands-on, iterative dashboard building
- Discussion of questions supplied in advance

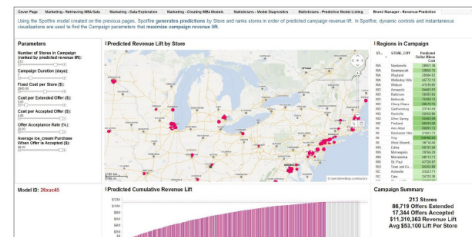

WORKSHOP #3: CUSTOMIZED PROBLEM-SOLVING

Do you have a specific analytics challenge you want to address? Based on your input received through discussion, we can develop a customized half-day workshop for your team. Items required prior to the workshop: pre-work, targeted (and bounded) hypothesis; sample(s) of representative hypothesis data.

Data Discovery and Visualization

Instantly visualize, interact with, and share data to spot the buried opportunities and risks no one else can see.

Dashboards and Analytic Apps

Bring insight to everyone by giving your data a voice that projects a clear message and encourages exploration.
