

TIBCO Spotfire Application Data Services for Oracle E-Business Suite

Features and Benefits

TIBCO Spotfire® Advanced Data Services serves as the foundation layer where the metadata for TIBCO Spotfire Application Data Services for Oracle EBS is federated. Spotfire Advanced Data Services provides valuable benefits:

- Eliminates the need to pre-build a data warehouse or data mart for CRM or ERP systems
- Offloads queries against mission-critical transaction systems to a just-in-time caching layer
- Introspects data models from packaged, API-based applications and delivers it to Spotfire Information Services, making it fully mash-able with other sources of information and ready for ad hoc analysis
- Accelerates data modeling with a pre-built set of the most common data views for each application
- Provides a complete set of powerful and flexible tools to prepare data for Spotfire analysis
- Speeds data retrieval from slow data sources using the optional caching layer
- Allows users to schedule data updates at specified frequencies so that data is available for analysis when users are ready

At a Glance:

TIBCO Spotfire® Application Data Services for Oracle E-Business Suite (EBS) enables business users to perform visual data discovery and reporting on key business and financial data in EBS. Spotfire Advanced Data Services serves as the foundation layer so that content from EBS can be delivered as pre-built, reusable data services directly to Spotfire.

Financial data from EBS helps you derive a big picture view of your business. For example, combining accounting data from EBS with legacy (general ledger) systems helps you quickly close monthly books and make timely business decisions.

Using SQL, Spotfire Application Data Services for Oracle E-Business Suite unlocks EBS data and makes it available to the TIBCO Spotfire platform. High-level abstracts of the most common business objects, such as invoices, journals, and bill of materials are transparently delivered on-demand into Spotfire. Data from EBS is fully compatible with Spotfire dimension-free data exploration capabilities, and it's easy to combine and visualize data from other sources, create comparisons, develop insights, identify correlations, and make educated decisions to effectively run your business—all within a unified Spotfire user interface.

Spotfire Application Data Services for Oracle E-Business Suite delivers significant value for a wide range of business scenarios including:

Operational Business Intelligence: Empower business users to perform visual data exploration and publish the results as dashboards, key performance indicators (KPIs), and reports powered by on-demand information sourced from Oracle EBS. This capability enhances management visibility and enables every-day, data-driven business decisions.

Single View: On-demand aggregation of operational and historical data about a given business object, such as “customer,” across Oracle EBS and other data sources improves visibility for front-line workers.

Data Integration: Combine warehouse data with Oracle EBS, providing a wide view of enterprise data sources while removing location details and complexity. This integration allows for simple ad-hoc queries as well as development of more sophisticated applications requiring data from multiple sources.

Enterprise Applications supported by TIBCO Spotfire Application Data Services

- SAP BW 3.5, BI 7.0
- SAP R/3 4.7, mySAP 5.0, 6.0
- Siebel 7.7, 7.8, 8.0
- Oracle E-Business Suite 11.5.8, 11.5.10
- Salesforce.com

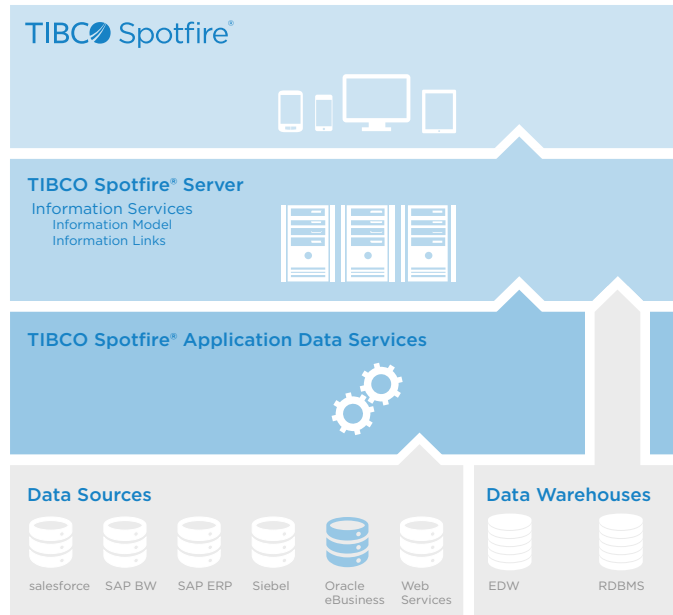

Supported Platforms

Server

- Red Hat Enterprise Linux AS 3 32bit, 4x, 5x, 6x
- Sun Solaris 9x, 10x
- SUSE Linux Enterprise Server 9.3 32bit, 10x, 11x
- Microsoft Windows 2008, 2012, Vista Business Edition, Win 7

Client

- Microsoft Windows Vista, Win 7

Spotfire Advanced Data Services federation layer for Application Data Services for Oracle EBS

Attributes & Capabilities

- **Pre-built Content:** Frequently used business information comes pre-packaged with context, accelerating projects and reducing risks.
- **No Coding:** Eliminates programming and API complexities, saving you time.
- **Data Integrity:** Enforces application-level user authentication and restricted data access based on user responsibilities.
- **Non-Invasive Access:** Supplies lightweight, low-risk integration. No need to install anything on your Oracle application.
- **Data Caching:** Mitigates the impact of frequently requested queries with table and file caching.
- **Data Updates:** Supports transactional inserts, updates, and deletes.

TIBCO Software Inc. (NASDAQ: TIBX) is a global leader in infrastructure and business intelligence software. Whether it's optimizing inventory, cross-selling products, or averting crisis before it happens, TIBCO uniquely delivers the *Two-Second Advantage*®— the ability to capture the right information at the right time and act on it preemptively for a competitive advantage.
